Bathrooms – this is a crappy subject but needs to be discussed. Many cottages have added small (and not so small) chemical toilets. Of course they need to be periodically emptied. We have started to see two problems with the emptying of the chem-johns into our bathrooms. First, sometimes there is so much solid waste (I said this was a crappy subject.... ☺) dumped in, that the toilet clogs when flushed. Second, when dumped the waste sprays all over the toilet, floor, and walls causing a real mess and rendering that stall unusable. So, please be courteous to your fellow campers and empty slowly to avoid splashing and creating a mess. Flush early and flush often to avoid nasty clogs. We are exploring installing a trap door to dump waste directly into one of our septic fields to provide a more direct route to empty waste. However until that is finished, please follow those simple steps.

If your camper is interested in participating in our weekly cooking class, please make sure they turn in their cooking forms each week to Kelli or Jodi by Monday's swim lessons. This is important so they can plan food accordingly for the campers.
